Write your final composition here.

G 14a

Everyone has dreamed of having a wish come true. If I had a wish, it would be that Nana from Florida would move to Kingsport. I only see her once every year; so being around her, spending time going places, and seeing mom happier would be great.

Relatives are always great when they visit! Nana never visits with us but once a year. It would be very nice if I could see her more often. When she visits, the time goes by quickly. It would be more enjoyable if we could see her everyday, as well as doing activities together.

Everyday I think about the time we shared the summer before. I wish that everyday we could go places together. When we are together, we always have fun. If she lived in Kingsport, we could be with each other every moment of the day. Mom and Nana are very close, therefore, they would be inceptable if they were together.

Mom has always been there when it comes down to everything. She always enjoys our time together. I wish that she could have her mother doing the same for her. Mom and Nana are like two peas in a pod, they even act the same. Mom is always talking about Nana, I just wish they could talk face to face with each other.

When I spend time with her, it's like seeing a newborn baby for the first time. She always enjoys time with us as well as we spending time with her.

## G 14b

She is a great woman who would do anything to be with the ones she loves in Kingsport. If we were together everyday, it would feel like we not even the hours we spent were enough time! I only see her once every year, so being around her, spending time going places, and Mom being happier.

### Score Point: 4

This response reflects proficiency in expository writing skills. The writer selects a special wish and adequately develops key ideas to support this choice. The writer avoids artificial transitions and includes some descriptive phrasing (like two peas in a pod, like seeing a newborn baby for the first time). However, the response becomes repetitious, the syntax lacks variety and the conclusion is somewhat awkward.
